Request for Proposals for the appointment of service provider/ Consultant to develop a Donor Database for SANAC

1. Background

The South African National AIDS Council (SANAC) was established by the Cabinet of the South African (SA) Government to build consensus among government, civil society, private sector, and all other stakeholders to drive an enhanced country response to the epidemics of HIV, TB, and Sexually Transmitted Infections (STIs) in SA. SANAC operates under the leadership of the Deputy President and its functions are being supported by a Secretariat based in Pretoria.

SANAC has a mandate to develop and support the implementation of the National Strategic Plan (NSP) for HIV, TB and STIs in South Africa, which includes amongst other functions:

- The mobilization of domestic and international resources to finance the response to HIV, TB and STI (fund-raising from domestic and international institutions).
- Donor coordination to ensure efficiencies and amongst other, equity in the allocation and implementation of donor projects across the different SANAC sectors to ensure the multi-sectoral response and the NSP.
- Creation and strengthening of partnerships for an expanded national response to HIV, TB and STI among government departments and donor agencies, civil society, and non-governmental organisations (NGOs), the private sector and people living with HIV, TB and STIs.

Whilst the national HIV response in SA is funded primarily by the SA Government, the external development partners (Donors) also play a vital role in the management of

the response to HIV and TB in the country. It is therefore important that the Donor investments are coordinated and aligned to ensure coherence with priorities identified in the NSP and to ensure additionality and sustainability to government investments.

2. Purpose and objectives of the consultancy

SANAC seeks the services of a service provider to develop a Donor database / repository to enhance the tracking of Donor support, resources, programmes and implementation areas / geographies, amongst others. The desired database will serve as a central hub where all Donor funded implementers and their activities will be registered and archived. Visibility of Donor operations in the country will enable gaps in funding to be identified and will inform recommendations and donor funding requests to scale up operations to ensure there is focus for impact. The database will also be used to support resource mobilization and advocacy efforts, and strengthen stakeholder engagement. The successful service provider will be expected to develop a database that will track key information about all donors, including projects funded, areas of duplication, operational geographies, type of support (e.g. direct service delivery or technical assistance) and track performance of funded projects. The Donor repository will also enable management of Donor information, and enhance donor coordination by strengthening communication with donors and also enable successful fundraising requests.

3. Scope of work (SOW)

- a) To develop an electronic database the service provider will be required to undertake mapping of all NGOs and other entities in the country detailing the provinces, districts, and facilities that they support through donor funding. The mapping should include at least all major Donors / Funders in the country. The mapping should also include support from the Private Sector.
- b) Conduct a desktop review, key informant interviews, or other data collection mechanisms to establish the presence of any currently available systems in use in the country to manage/ track Donor support and ensure integration with the SANAC Donor repository that will be developed. This exercise should also draw lessons and best practices from other countries on how to develop, manage and sustain such repository.
- c) Develop the repository of Donor funded projects and implementers with built in functionality to track implementation progress, geographies and areas of duplication and service gaps.
- d) Work with relevant stakeholders to gather required information and ensure interphasing of the Donor database with the SANAC Situation room, currently under construction.
- e) Train end users (SANAC Secretariat) on the use and maintenance of the database / repository.
